NEW DELHI CITY

Colder Now: Power demand surges past last year's peak

City Discoms Claim They Are Ready For Winter Challenge

Sidhartha.Roy@timesgroup.com
New Delhi: With the temperature plummeting in the city by the seemingly early onset of winter this year, it is getting reflected in the power demand in the city. The peak power demand this November has already surpassed that of the same month last year prompting the discoms to gear up to meet a much higher demand this winter.

On November 20, the season's peak power demand was 3,676 MW compared with 3,671 MW recorded on November 15 last year, according to sources. But that's not all. The peak power demand has surpassed the corresponding demand on 12 days till November 21 compared with the same month last year. The days when the peak power demand surpassed the figures recorded in the same month in 2019 was on November 17 to 19, 20, 21 and 22.

The power distribution companies expect electricity peak power demand to go up to 5,000 MW this winter, surpassing last year's demand during the season. Last winter, the demand had peaked at 3,643 MW.

The peak power demand in Delhi during winter has been going up gradually. While it was 4,123 MW in the winter of 2015-16, it increased to 4,163 MW the next winter and to 4,511 MW in 2017-18. However, it dipped to 4,123 MW in the winter of 2019-20.

NEW HIGH

DELHI PEAK POWER DEMAND (IN WINTER)

2020-21	
2019-20	
2018-19	4,472
2017-18	4,511
2016-17	4,158
2015-16	4,123

NOVEMBER HIGH

Peak Power demand in November 2020 (MW)	3,676
Peak power demand in corresponding period in November 2019 (MW)	3,671

12 Days

this November when peak power demand surpassed the corresponding peak in November 2019

- Acute demand load, forecasting day ahead in 15 min slots, one-day gas and medium term (fortnight to one year)
- Discoms using advanced statistical forecasting models using complex algorithms, combined with state-of-the-art weather forecasting solutions, including artificial intelligence and machine learning
- Long-term agreements from power plants
- Use of 'banking' 'reserve shut-down', 'power exchange' to dispose of surplus power as well as ensuring reliable power supply
- Short-term power purchase from exchange, if required

Farmers feel betrayed by govt, says BJP

Times News Network

New Delhi: Delhi BJP president Adesh Gupta and leader of the opposition Ravi Singh Bishnoi on Tuesday said farmers in the capital had been betrayed by the Arvind Kejriwal-led Delhi government and were unhappy.

Referring to the bio-decomposer solution being proposed by Delhi government to the fields to prevent stubble burning, Gupta said farmers were not seeing that "medicine" in the capital. The government has installed huge hoardings in other states to propagate that the farmers of Delhi are getting medicine to make fertilisers from paddy stubble, which is reducing the pollution, the farmers of Delhi were yet to receive even one gram of fertiliser, he alleged. "Even today, the fields of Delhi are full of paddy stubble, which is

delaying the sowing of wheat," he said. Delhi government is also yet to give them the status of farmers. They are not getting any subsidy on the purchase of agricultural equipment and get the most expensive power across the country. They do not have permission to drill tubewells and there is no arrangement for *dakhil kharij* land," Gupta added.

Rai to panel: Make bio-decomposers must for all states

Times News Network

New Delhi: Environment minister Gopal Rai on Tuesday said Delhi government had submitted a petition to the Commission for Air Quality Management (CAQM) to make bio-decomposers a must for all states. He said the CAQM had developed a successful biodecomposition of the stubble burning developed by Indian Agricultural Research Institute (IARI) to stop stubble burning.

The government has submitted the data prepared by IARI to the Commission, the minister said. "In Delhi, we have around 2,000 acres where non-biodegradable rice is harvested and the bio-decomposer was sprayed in this whole area. We have found that nearly 90 to 95% of the stubble got converted into manure within 10 to 20 days."

MINISTER SAYS

If we look at Haryana, we will find that stubble burning in Haryana and Punjab have increased significantly. States of Haryana and Punjab have increased stubble burning. We also know that Covid-19 is a kind of disease that affects the lungs of people. In the amalgamation of the increasing number of stubble-burning cases, the pollution and Covid situations in Delhi are also becoming very critical," Rai said. The commission should make this technique mandatory for all states, including Punjab.

Rai said as the technique developed in Delhi, it improved the quality of the land. Through the Centre, we should make farmers buy machines, they avoid burning them, they save the money, he said. If all states adopt this bio-decomposition technique, the spreading of the solution "can happen in half the price," he added. The minister said they were hopeful that the commission would take cognisance of the government's request and stubble burning problem would go away from next year.

SDMC to install solar plants in 200 bldgs

Vidha.Sharma@timesgroup.com

New Delhi: To save energy and reduce electricity bills and generate revenue from its own resources, South Delhi Municipal Corporation (SDMC) plans to set up with National Thermal Power Corporation (NTPC) solar plants on over 200 buildings, including maternity centres, school offices, parking lots and school buildings.

The proposal was approved at a standing committee meeting on Tuesday which included signing a memorandum of understanding with NTPC. The SDMC has 200 buildings, including maternity centres, school offices, parking lots and school buildings.
